

HIPRA strengthens its diagnostic service to improve animal health in Argentina with the collaboration of LLAMAS Laboratorios

HIPRA's diagnostic service provides specialized testing and consultancy for the prevention of infectious diseases in animal production.

The collaboration with local laboratories will help bring the service closer to the local livestock industry, streamlining decision-making based on scientific evidence.

La Plata, July 30, 2025 – The biotechnology company HIPRA has announced a strategic alliance with the Argentine laboratory LLAMAS Laboratorios, nationally recognized for its expertise and prestige in the veterinary field. The main objective of this alliance is to strengthen and optimize the diagnostic service for animal production in Argentina. This will be achieved by expanding the range of locally available tests, increasing the value of results for decision-making, and reducing turnaround times, among other advantages. This service, together with HIPRA's vaccines, aims to prevent infectious diseases, thereby reducing related economic losses.

The synergy with LLAMAS Laboratorios will be key due to its high technological level and presence in the Argentine field, perfectly complementing HIPRA's technological and scientific capabilities to bring value to the country's veterinary sector.

Both companies emphasize their joint commitment to quality, innovation, and sustainability, highlighting this alliance as a positive example of cooperation, respectful of all market players, open to future collaborations with third parties, and clearly aimed at benefiting professionals in the veterinary field.

HIPRA Diagnos

HIPRA Diagnos is a comprehensive support service for field veterinarians that offers fast and reliable analytical testing, accompanied by specialized consultancy. Its goal is to prevent the emergence of the most impactful infectious diseases in animals and to guide decision-making in animal health and vaccination.

The trust built around this HIPRA service over its 40 years of existence is reflected in its widespread use, with around 600,000 serological analyses, 80,000 molecular analyses, and 10,000 microbiological and parasitological analyses performed annually, among other specialized services.

About HIPRA

HIPRA is a biotechnological pharmaceutical company focused on prevention in animal and human health (One Health), offering a broad range of highly innovative vaccines and an advanced diagnostic service. With its claim **“Building immunity for a healthier world”**, HIPRA reaffirms its commitment to contributing solutions that improve global health.

It has a strong international presence, **with 40 subsidiaries, 3 R&D centers, and 6 manufacturing centers** strategically located in Europe (Spain) and the Americas (Brazil). In addition, its extensive international distribution network maintains open commercial channels with nearly 100 more countries, covering all 5 continents.

Research and development form the core of its expertise. HIPRA invests **more than 10% of its annual revenue in R&D** activities focused on creating and applying the latest scientific advancements to develop top-quality innovative vaccines.

HIPRA has a portfolio of vaccines based on different technological platforms. Its R&D teams work with a wide array of technologies and biological modalities.

To add further value to its vaccination expertise, the company also develops medical devices and diagnostic and traceability services for animal health.

About LLAMAS Laboratorios

LLAMAS Laboratorios is a well-known Argentine veterinary diagnostic laboratory specialized in infectious and parasitic diseases, food analysis, raw materials, and effluents from industries related to animal production.

It also has a technical team that advises clinical veterinarians on various aspects of diagnostics and animal health. It was the first private veterinary diagnostic laboratory in South America to achieve accreditation under the **IRAM 301 – ISO/IEC 17025:2005** standard for the competence of testing and calibration laboratories. It is currently accredited under the updated IRAM – ISO/IEC 17025:2017 standard.

LLAMAS Laboratorios offers an extensive range of services and brings over 34 years of experience delivering high-value services to Argentina’s livestock sector.
